Intelligent Access Management

It's Right at Home in an Academic Setting.

The resources in your building are more precious than the inventory in any business. In addition to physical property, it's your responsibility to keep kids safe. That's why we developed a brilliant innovation in school security: **bright blue**™. It's an affordable, web-based access control and digital video system that gives you a level of security previously available only to large corporate facilities. Best of all, it's incredibly easy to use.

Thanks to **bright blue's** smart-yet-simple design, there's no longer a need to re-key locks, change pushbutton PIN numbers or track down unauthorized keys. Just plug it in and you're in control of who goes where, when. And with integrated video you'll enjoy enhanced security and greater peace of mind. This blue box is very bright, indeed.

If Blue isn't Already Your School Color, You'll be Tempted to Change.

Easy to Install.

bright blue is preconfigured and network ready, so there's no software to install. Plus, easy-to-use wizards walk you through set up.

Easy to Learn.

You won't need summer school to master **bright blue**. With minimal training, you'll be up to speed on its user-friendly software interface.

Easy to Use.

bright blue lets you add, delete and manage users from any computer with an internet connection.

Easy to Afford.

bright blue is priced so schools can afford it. And it immediately begins paying for itself, because there's no need to re-key locks or purchase a dedicated PC.

Easy to Love.

bright blue means electronic access control that's as secure as it is simple.
